-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 7, 14, and 35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12-10-04.
2. The examiner has also determined that claims 20-30, 34 and 50 do not read upon the elected species.
3. The examiner agrees with the applicant that claims 37 and 41 are generic, and they will be treated as such.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-6, 8-12, 18, 19, 31-32, and 36-49 are rejected under 35 U.S.C. 102(e) as being anticipated by Burgess et al.

Burgess discloses a cross connector comprising:

- A lockable central portion 22;
- A connector 16;
- 1st and 2nd jaws 32 and 42;

Art Unit: 3732

- A locking mechanism that has a threaded and non-threaded portion 34;
- A central portion that has two members that slide relative to each other; and
- The surface of the clamps have a surface feature formed thereon to facilitate engagement of a rod.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 13, 15-17, 47, and 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burgess.

Burgess connector element is not integral with the central member. It would have been obvious to one of ordinary skill in the art at the time of the invention to the members integral, since it has been held that forming an article in one piece which has formerly been formed in two pieces and put together involves only routine skill in the art. *Howard v. Detroit Stove Works*, 150 U.S. 164 (1983).

8. Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jackson et al.

Burgess lacks the use of ridges in the clamp. Jackson teaches the use of ridges to engage a rod. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Burgess with the ridges as taught by Jackson in order to better secure the rod.

Claim Rejections - 35 USC § 112

9. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3732

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

10. Claim 45 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

11. Where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999). The term “push” in claim 45 is used by the claim to mean “pull”, while the accepted meaning is “force away from.” The term is indefinite because the specification does not clearly redefine the term.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nichols et al., Schafer, McKay, Thomas, Jr., Hoeck et al., Richelsoph et al., and young et al. disclose relevant art to the instant application.
